Philippines Refugee Statistics, 2012-2022:

An Applied Data-Mining and Visualization Study

Emerson C. Antic

October 11, 2026

Purpose and Research Questions

Examine **annual changes** in refugee and asylum-seeker counts recorded in the Philippines

Identify **countries of origin** with the largest refugee populations

Compare **refugees** with **asylum-seekers** by counts and trends

Detect notable **changes by country** over time

Describe **historical patterns** without inferring causes or social effects

Dataset and Variable Classification

11
years of data
2012-2022

31
countries
represented

THREE TYPES
of variables

QUALITATIVE

Year
temporal / ordinal
Asylum Country
Country-of-Origin
nominal

QUANTITATIVE

UNHCR-refugees
Asylum-seekers
Total-count
discrete

RELATIONSHIP

Total-count
=
UNHCR-refugees
+
Asylum-seekers

DATA QUALITY CONSIDERATIONS

Verify “Asylum Country” meaning per original documentation
Check for missing values, duplicates, inconsistent country names
Confirm Total-count = UNHCR-refugees + Asylum-seekers per row
Dataset does not confirm physical residency or causal factors

Year	Asylum Country	Country-of-Origin	UNHCR-refugees	Asylum-seekers	Total-count
2012	Philippines	Syria	120	45	165
2013	Philippines	Afghanistan	98	32	130
2014	Philippines	Somalia	210	70	280
2015	Philippines	Myanmar	305	95	400
2016	Philippines	Iraq	150	60	210
...	...	...	...	...	...
2020	Philippines	Ukraine	180	50	230
2021	Philippines	Yemen	160	40	200
2022	Philippines	Venezuela	220	80	300

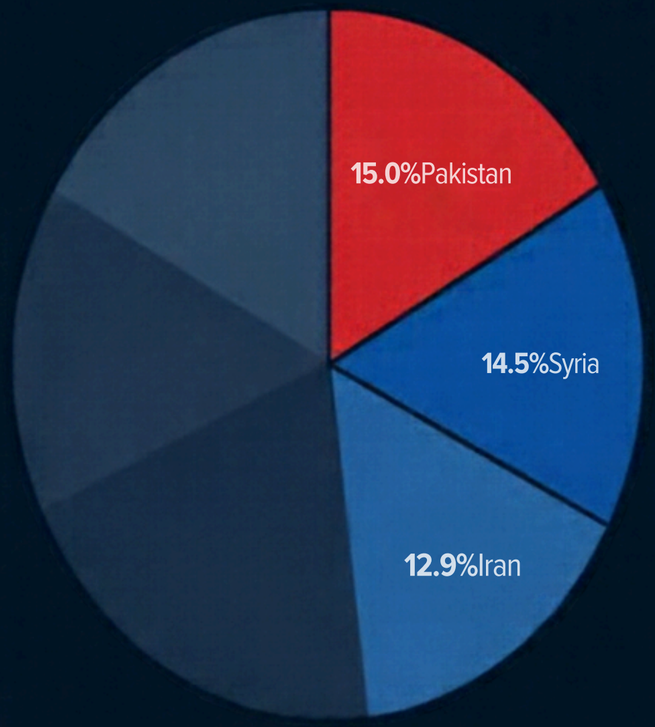
Visualizations from the Report

Key visual tools that reveal refugee and asylum-seeker patterns in the Philippines.

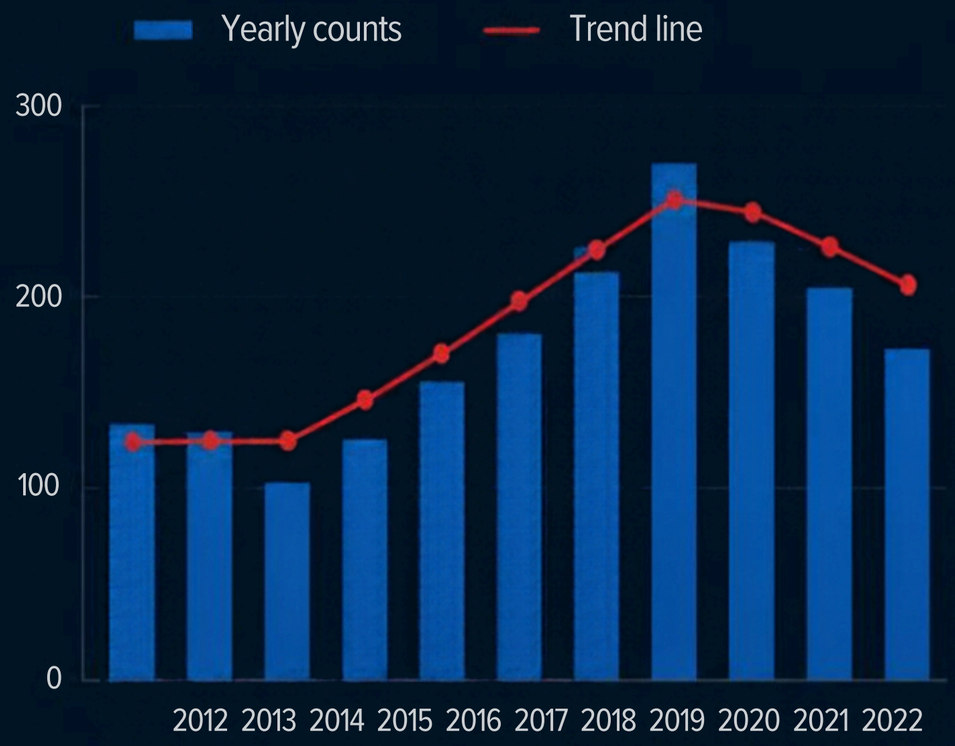
OVERVIEW SCORECARD

Total refugees	**512**
Total asylum-seekers	**210**
Combined total individuals	**722**
Countries represented	**31**

COUNTRY-OF-ORIGIN SHARES



ASYLUM-SEEKERS OVER TIME



Key Findings

Total recorded population

722

individuals over 11 years

512
Refugees

210
Asylum-seekers

Largest country-of-origin shares

Pakistan **15.0%**

Syria/Syrian Arab Republic **14.5%**

Iran **12.9%**

Steady upward trend in refugee and asylum-seeker counts

Average annual asylum-seeker count: approx. 28.5

Average cumulative baseline population: approx. **293.4** individuals

Limitations and Conclusion

LIMITATIONS

Dataset alone cannot establish causes or social impacts

Possible inconsistencies or ambiguities in variable definitions and data quality

Do not assume physical residency or effects without verified context

CONCLUSION

This report provides a descriptive longitudinal overview of refugee statistics related to the Philippines

Findings serve as a basis for further research and exploration with caution
